

Jaya Surya Ravipati

Full Stack Developer — Data Analytics — Python — SQL

☎ +91-9391711556 ✉ suryaravipati556@gmail.com in LinkedIn 📁 Portfolio

SUMMARY

Motivated Information Technology student with hands-on experience in **full-stack development, data analytics, and data science**. Skilled in **React.js, Node.js, Python, SQL, Pandas, NumPy, and Power BI**, with experience building web applications and analyzing real-world datasets. Familiar with **REST APIs, MongoDB, data cleaning, exploratory data analysis, data visualization, and basic machine learning concepts**. Eager to apply technical and analytical skills to build applications and solve real-world problems.

EDUCATION

- **Aditya Engineering College, Surampalem** 2023 – 2026
Bachelor of Technology (B.Tech) in Information Technology **CGPA: 7.63**
Surampalem, Andhra Pradesh
- **Swarnandhra College, Narsapuram** 2020 – 2023
CME (Computer Engineering) **Percentage: 77%**
Narsapuram, Andhra Pradesh

SKILLS SUMMARY

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Frontend Development:** React.js, Next.js, React Native, HTML5, CSS3, Bootstrap
- **Backend Development:** Node.js, Express.js, REST APIs
- **Data Analysis:** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization
- **Machine Learning:** Scikit-learn, Basic Machine Learning Concepts
- **Data Visualization:** Power BI, Matplotlib, Seaborn
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Jupyter Notebook, Google Colab, VS Code, Postman, Git, GitHub
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Authentication, API Integration

EXPERIENCE

- **TechnicalHub** Surampalem, Andhra Pradesh
Full Stack Developer Intern Dec 2024 – Jan 2025
 - **Built** and deployed **3+** full-stack applications using **React.js, Node.js, Express.js, and MongoDB**, working with structured application data across multiple modules.
 - **Developed** and integrated **10+ REST APIs** using **Node.js** and **Express.js** for data retrieval, validation, processing, and storage.
 - **Implemented CRUD operations** with **MongoDB** and worked with application datasets to support user, request, and transaction-related functionality.
 - **Investigated** and resolved **20+** frontend, backend, and data-related issues through debugging, validation, and code analysis while collaborating with a team of **4** developers.

PROJECTS

- **🗺 SMARTMAP** **🔗 [GitHub]** — **MERN Stack, Google Maps API**
 - **Built** a smart delivery management application using **React.js, Node.js, Express.js, and MongoDB** for managing drivers, deliveries, and routes.
 - **Integrated** the **Google Maps API** to provide interactive map visualization and delivery route tracking.
 - **Developed 12+ REST APIs** for delivery, driver, authentication, and route management with MongoDB data storage.
 - **Implemented** a responsive React dashboard with delivery management features, route visualization, and role-based access.

-  RequestHub  [GitHub] — React Native, Node.js, Express.js, MongoDB
 - **Developed** a full-stack service request application using **React Native, Node.js, Express.js, and MongoDB**.
 - **Implemented** user authentication and request management features for creating, tracking, and updating service requests.
 - **Built** reusable mobile UI components using **React Native** and integrated backend services through REST APIs.
 - **Managed** application data using **MongoDB** and implemented CRUD operations for users and service requests.
-  Employee Attrition Analysis  [GitHub] — Python, Pandas, Power BI
 - **Analyzed** the IBM HR Analytics dataset containing **1,470 employee records** using **Python, Pandas, and NumPy** to identify factors associated with employee turnover.
 - **Performed** data cleaning, preprocessing, and **EDA** across **10+ employee attributes**, including department, job role, age, salary, and tenure.
 - **Created 10+ visualizations** using **Matplotlib and Seaborn** to identify attrition patterns across departments, job roles, salary bands, age groups, and tenure.
 - **Developed** an interactive **Power BI dashboard**, visualizing key employee attrition KPIs across **1,470 employee records** to support employee retention analysis.
